Data Modeling > Understand Custom & Standard Objects

Do you use Salesforce in a language other than English? Set the language of your hands-on org to English before you attempt this challenge. Want to find out more about using hands-on orgs on Trailhead? Check out [Trailhead Playground Management](#).

YOUR CHALLENGE

Build a custom Offer object

When a homebuyer makes an offer to buy a property, the brokers at DreamHouse Realty need to track the details in Salesforce. Create a custom object they can use to record the offer amount and target close date for the sale. Use auto numbering to generate the name of each offer record.

- Create a custom object named **Offer**
- Record name: **Offer Name**
- Record data type: **Auto Number**
- Display format: **00-00000**
- Starting Number: **1**
- Create a custom currency field on the Offer object named **Offer Amount** with the data type **Currency**
- Create a custom date field on the Offer object named **Target Close Date** with the data type **Date**
